Science Revision Guides for Year 10

Dear Parents / Carers,

Your child is either studying triple (separate) science or combined trilogy science. Our exam board is AQA. We would strongly recommend the purchase of the Oxford Revise revision materials to aid them in their revision. These resources provide key information of all the topics that will need to be revised for the GCSE exams and also provide retrieval questions and exam style questions. Furthermore, there are maths booster skill activities. These resources will help students to develop the necessary knowledge and skills needed to improve their progress and attainment in their examinations.

Revision Guides

We can order the revision guides shown below at reduced prices (50% discount). Combined Science £9. Triple Science Biology £4. Triple Science Chemistry £4. Triple Science Physics £4.

Please select which product(s) you would like and pay online via SCOPAY by 4/12/2020. You will need to select the guide for the correct Science course (combined science or biology, chemistry and physics separately) and the correct tier of entry that your child is aiming for (higher or foundation).

Yours faithfully,

Mr Hardman
Head of Science

Ella Brett **Headteacher**
